

# VENUE MAKER

**STAGE**  
Patent Pending

# STAGING INNOVATION FROM TOP TO BOTTOM.

The **NEW** Venue Maker Pro™ Stage\* (VMP) includes features no one else offers: Top-deck leveling, V-shape frame design for easy under stage access, and the smallest storage footprint of any stage in its class.

### Active Storage

Store and transport the decks directly on the stage frame to save time setting up and taking down. Simply lift the frame from the adjacent frame and slide them on top of the frame you would like to keep unfolded. Stack five decks onto one frame to save the most space.

### Multiple Heights & Lengths

Configure your stage in a multitude of layouts and heights with ease. Adjust the height and level the stage in 3 steps: set main height using frame posts; course adjustment leveling using glides; and fine adjustment from the top deck.

### Intuitive Setup

All pin connectors, decks, and frames are the same and require no instruction to operate. Storage and setup direction is streamlined when there are no loose parts or tools required. No need to store extra pin connectors or spare parts.

### Step-Through Design

V-shape frame allows for storage and easy access underneath the stage deck while in use. Run cords through the middle of the frame and easily get from one side to the other without dodging posts or stepping over large beams.

### Compact Storage

The smallest storage footprint of any stage in its class. Roll by hand or use a forklift to move into and out of use. Use many storage options to create a configuration that best fits your space. Use stacking trays to stack frames three high to utilize vertical space.

### Top Deck Leveling

Fine tune the level plane from above the deck surface with this option exclusively from SICO®. Greatly reduce set-up and leveling time so you can get your next event rolling with ease and within a tight timeframe.

# FOLD & ROLL

## 3X SIZES

**4'x8'**  
(1.22m x 2.44m)

**8'x8'**  
(2.44m x 2.44m)

**12'x8'**  
(3.66m x 2.44m)
