FOR IMMEDIATE RELEASE

SICO[®] Incorporated Introduces Buffet Tables with Unique Diamond Cross Frame
New simple, elegant frame design plus reversible tops and configurable construction make more display arrangements possible.

Minneapolis, MN, October 30, 2019 – SICO[®] has introduced Buffet Tables with a unique Diamond Cross Frame offering a wide variety of configurations, giving hospitality professionals more style and set-up options with which to serve and impress their guests.

These innovative tables feature reversible tops in a bold array of on-trend designs and colors. The tops lift off easily, with no clasps or triggers, and the frame folds down flat to make teardown quick and smooth. And with SICO[®] table caddies, staff members can simply roll the tops and frames into and out of storage. It's a creative solution for hospitality managers who need versatile display tables that flex to their space and scheduling needs but don't require time-consuming, costly labor.

"The elegant, simple design and unique look of the Diamond Cross Frame Buffet Tables make any event more special," said Adam McMahon, Hospitality Sales Manager. "Hospitality professionals can combine tabletop shapes, designs, sizes and heights to generate an eye-catching layout that's also very practical for presenting foods and beverages. These new tables put dozens of possible arrangements at their fingertips – creating a simple, stylish display."

With round, square and rectangular shaped tops, more than two dozen laminate designs, and five frame finish options – each with a distinctive diamond cut – it's easy for facilities to create the look and functionality that will optimize their space and their guest's experience.
