Before you begin...

**WARNING!** Read and understand these instructions before operating. Failure to do so may result in serious injury.

Use care when lifting, pushing or pulling these units. Never lift more than you are able to safely handle.

Keep this manual in a safe place for future use.

If you have any problems during setup, contact SICO® Customer Care at 1.800.424.0796.
Introduction
Thank you for purchasing your new SICO® Mobile Bar. We appreciate your business and rest assured, you can feel confident that you have made the right purchase decision. It is our pleasure to provide you with a product that will perform to your every expectation and embodies the high quality standards and service that SICO® is known for around the globe.

Your satisfaction is our #1 priority at SICO®. For over 60 years, SICO® has been a leading, worldwide manufacturer of mobile folding products to help facilities maximize the efficient use of their space. From our renowned portable dance floors to our full line of mobile folding tables and easy to use mobile folding stages, we offer a host of innovative products that offer the same ingenuity and quality that so many of our customers have come to expect from SICO®.

Should service become necessary, your SICO® Mobile Bar is backed by one of the finest warranties in the industry. This owner's manual will answer most questions concerning the features, operation and care of your new SICO® Mobile Bar. If you find you have a question not addressed here, please do not hesitate to contact SICO® Customer Care.

Once again, from the entire staff at SICO®, we thank you for choosing our products and look forward to serving you again in the future.

Safety and Precautions

As you read the information provided in this manual, please pay particular attention to the CAUTION and WARNING symbols as they appear. This information is very important to all users for the safe and efficient operation of SICO® products.

In addition, throughout this manual you may find ♦ that signals an IMPORTANT NOTE, which highlights information that should be noted.

Installation and Setup

The SICO® Mobile Bar is designed for minimal setup time and ease of operation. Many unit configurations arrive fully assembled and ready for use.

Simply roll to the intended location, load the items to be used, and your SICO® Mobile Bar is ready to serve your customers. If you have any questions or concerns during this initial setup, please contact SICO® Customer Care.

General Operating Instructions

Casters

The SICO® Mobile Bar comes with 2 locking casters on the working side. Release the brake on the caster by lifting up on the brake lever to allow the Bar to move in any direction. Lock the casters by stepping down on the brake lever when it is time use the station.
General Operating Instructions, continued

Food & Beverage Display Stations with Ice Bins
The ice bin is designed to drain the excess water. A removable bucket or bin to collect the water as it drains is supplied and must be used by the owner. When the bucket is full with water, it should be replaced. To not let any water drip on to the working shelf, have an empty bucket ready to catch draining water as the full bucket is emptied by the operator.

Speed Rails
To remove or add SICO® speed/bottle rails, simply empty the speed rail, loosen the screws on the front of the Working Counter with a Phillips screw driver. Please don't remove the screws, but make enough room so that the speed rail can be lifted up and over the screw head. When the speed rail is finished being installed or removed, tighten the screws. These screws assist in maintaining the working counter in place on the unit.
Mobile Bar Care and Cleaning

As you use your mobile bar, it will need regular maintenance to keep it in good condition. To prevent dirt and debris buildup, operators should dust off and wash their bar surfaces after every use, both on inside and outside of the unit.

For more specific instructions, see SICO’s Care and Cleaning document (122501)

Everyday Cleaning

Simply wipe over with a damp cloth using a mild dish washing detergent. Mild household cleaners such as 409®, Fantastik®, Lysol®, or Windex® are acceptable. After cleaning, wipe completely dry to avoid streaks. Do not use steel wool products, oven cleaners, abrasive pads, bleach or other abrasives. The normal use of the bar will allow debris to accumulate in the bar’s openings and joints.

A Few Notes of Caution

- Acidic or abrasive cleaners can damage laminate surfaces; do not use them.
- Drain cleaners containing lye will permanently damage any laminate surface. If you spill a drain cleaner, wipe it up immediately and rinse several times with water.
- Textile and food dyes can cause permanent stains. If dye should happen to spill, wipe it up immediately with dish washing detergent or an all-purpose cleaner.
- Never place pots or dishes directly from the oven or burner on an unprotected laminate surface; such extreme heat can cause cracking or blistering.
- Do not work with oven cleaners on an unprotected surface. Wipe spills away promptly and rinse several times with water.
- Rust removers contain harsh chemicals which will quickly cause permanent damage. If a spill occurs, wipe off all residues immediately, wash with soapy water and rinse several times.

Mobile Bar Frame

Your product is scratch-resistant but as with any painted surface, care should be taken. If the depth of the scuff/scratch is not deep enough to see metal, it may be removed with a buffing pad and some buffing compound. If metal is showing, a touch up paint will be needed to protect the metal. Touch up paint can be ordered from SICO® Customer Care.

Working Counter, Ice Bin & Trash Chute (Stainless Steel components)

For more specific instructions, see SICO’s Care and Cleaning document (122501)

If your stainless steel comes into contact with water or ice, regular and occasional deep cleanings are needed to prevent contamination.

Regular cleanings should be done after each use, or at least once per day when in use. Clean the areas that see human contact with a using a soft cloth and soapy water.

After every use, deep cleaning of the ice bin should take place, where the entire ice bin is cleaned. Some cleaning solutions can produce harmful gases. Please proceed with the manufacturer’s instructions. When you clean the bin, use a nylon brush or clean cloth, ensuring to reach all corners, to fully clean the surfaces. Sanitize the bin with bleach and water solution. 1 oz of chlorine bleach should be added to 1 gallon of water for this solution. Spray the surface with the solution and wipe up the liquid with a clean cloth. Typically, longer contact of the solution will provide better cleaning. Since de-scaling and sanitizing products can be harmful if mixed, make certain to separate these activities. In this process, remove the ice bin and trash chute (product dependent) and add Thompson’s® WaterSeal® to the wood surfaces.

If removal of the ice bin is desired, simply lift the bin straight up out of the holes, and when the bottom of the bin has cleared the hole in the counter, move it toward the working side, to clear the serving counter. Lift the bin out the rest of the way.

When replacing the ice bin, use care to ensure ice bin and counter are not damaged.

Surfaces and Panels
For more specific instructions, see SICO’s Care and Cleaning document (122501).

Suggested Maintenance Items

Casters
• Check to make sure that the stop nut for the caster is securely fastened and the caster is not loose.
• Verify that the caster housing is not bent as that will cause alignment issues. If your caster assembly is bent, or the swivel portion is loose, the caster will need to be replaced.
• Periodically, inspect the tread of the casters to ensure they are not damaged and in need of replacement.

Fasteners: Frame, Surfaces and Panels
• Periodically verify that the bolts holding the frame, surfaces and panels together are securely fastened. Some disassembly may be required to access certain bolts, such as the bolts behind the panels or removing the working counter. A loose frame can cause damage to the panels and casters. Contact SICO® Customer Care for additional instructions.

Speed Rails, Trash Chute, Glassware Racks, & Heavy-duty Bumpers
• Occasionally check the accessories to verify that they are not damaged. If there is damage, please call SICO® Customer Care to get your replacement.
Please use your Serial Label to identify any items when calling SICO® Customer Care. It is located on the frame in the upper left side of the lower cabinet (Item 36).

6ft Mobile Bar (Looking From Working Side)
MOBILE BAR STATION WARRANTY

SICO® America, Inc., Minneapolis, Minnesota fully warrants its Mobile Bar stations to be free from defect in materials and workmanship for a period of one (1) year from the date of delivery. Product defects arising from faulty materials or unsatisfactory workmanship will be replaced or repaired to a serviceable condition free of charge to the original purchaser for said period of one (1) year, providing the products have been properly installed and maintained in accordance with the manufacturer's printed maintenance instructions attached to every SICO® product when shipped. The foregoing is SICO's exclusive warranty with respect to the products purchased. SICO® MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PURPOSE, and makes no other warranties except for the warranties expressly set forth above.

All repairs and returns must be approved, in writing, by SICO® before action is taken. The product serial number will be required to process and authorize any warranty claim. All claims are to be reported to:

SICO® America, Inc.
Customer Care Department
1.800.424.0796
support@sicoinc.com

Address:
7525 Cahill Road
Minneapolis, Minnesota 55439

Repair or replacement in accordance with the foregoing procedure is the buyer's sole and exclusive remedy for any defective products, whether buyer's claim arises under contract, tort or otherwise. SICO® shall not be liable for any on sequential damages, and in any event, SICO's liability is limited to the purchase price paid for the products purchased.
Please have the serial number of the product when contacting Customer Care to receive assistance for:

- Selecting replacement parts/decals
- Repairing the product
- Adjusting and operating the product
- Obtaining online assistance
